US Citizen in Seaford, NY

## Education

- M.S. in Computer Science, Adelphi University Status - In Progress (Jan 2026 - Dec 2026)
- B.S. in Computer Science, Adelphi University Status - Graduated (Aug 2022 - Dec 2025)

## Work History

*Full-Stack Software Engineering Intern - Lending Automator - Remote* Mar 2026

- Contributed to a production fintech platform used by brokers and applicants to manage loan workflows
- Utilized AI tools such as Claude Code to build and refine UI components using Next.js and TypeScript to improve usability and navigation for brokers and loan applicants
- Developed serverless API endpoints to fetch and display new loan and application data
- Integrated backend services with MongoDB, AWS and ZoHo

*Graduate Teaching Assistant - Adelphi University - Garden City, NY* Feb 2026 - Present

- Assists students in lab sections with Python, Java and SQL
- Provides outside tutoring services and grades assignments

## Projects

*PachinGO ([www.playpachingo.com](http://www.playpachingo.com))* Aug 2025 - Present

- Built a frontend using Next.js, React, and TypeScript to host a web-based game and community features, including custom level search, sharing, and media delivery through Amazon CloudFront
- Built a backend using Node.js, Express, and TypeScript to expose RESTful APIs for MongoDB Atlas, Amazon S3 object storage, authentication, file uploads, and Python-based thumbnail generation workers
- Containerized frontend and backend services with Docker, published images to Amazon ECR, and deployed workloads to Amazon EKS using Kubernetes manifests
- Provisioned AWS infrastructure with Terraform, including Amazon VPC, EKS, ECR, S3, CloudFront, Route 53, ACM, IAM, Secrets Manager, Application Load Balancer, CloudWatch, and AWS Budgets
- Implemented CI/CD with GitHub Actions and AWS IAM OIDC federation to build, push, and deploy containerized services without long-lived AWS credentials
- Managed source code using Git and collaborated in an Agile development workflow
